

Project: Parson's Mount Sheltered Housing
Sector: Housing
Location: Mount Lane, Newark, Nottinghamshire
Client: St Leonards Trust
Approx Value: £1.4m

The project saw the construction of a new sustainable development providing 22 sheltered housing units.

Sustainability was a major criterion for the project from the start and the development meets the requirements of Code for Sustainable Homes Level 4, and will be the first development of its kind in Newark.

The development features sustainable materials and building techniques such as green roofing, timber framed construction and high efficiency glazing.

The individual dwellings are designed to a high standard and all units feature full disabled access and emergency warden call systems, as well as flexible living spaces which can be customised to suit the requirements of individual occupants.
