£1.2m

GNA were appointed cost consultant and QS in this high quality scheme of eight apartments set in the heart of Forest Hill, South East London.

The new build scheme offers an Edwardian style facade with all the advantages of modern contemporary living with the construction of two unique three bedroom duplex apartments to the lower ground floor and a further six one bedroom properties to the upper floors.

GNA's experience in the field of residential new builds was instrumental in ensuring challenging building regulations conditions were met due to its timber frame construction and in controlling costs carefully considering the projects notoriously expensive inner London location.
