- Industrial Facilities

Services & Team : 05

Team

Building Surveyors, Quantity Surveyors, Safety Advisors and Project Managers, GNA is a one-stop multidisciplinary practice with a 30 year track record in delivering quality advice to the building and construction industry.

Based in the Midlands, with an affiliated office in Plymouth, we are able to cover the whole of the UK and have also worked in the European Union. Together, with our architectural and structural design partners, we deliver our client's expectations on the most demanding of projects.

Quantity Surveying

We can form bespoke teams for a whole range of project types from housing to fire stations, sport, leisure, retail, military, visitor attractions and civil or services contracts. From the inception of a project to final account, our Quantity Surveyors specialise in accurate and timely cost and contractual advice.

Our aim is always to ensure that our clients get maximum value for money. We are experienced in the traditional QS role as well as design and build (Employers Agent), target cost and management contracts.

Building Surveying

The Building Surveying department delivers valuable advice for building owners, landlords, tenants and purchasers. Whether you are a landlord, new or existing tenant or buying a property, the advice of a Building Surveyor can prove invaluable.

CDM

Our Construction Health and Safety department is well known for providing clear, accurate and helpful advice on all issues relating to CDM and construction health and safety.

Our staff are all neobosh trained but also have other construction and management related qualifications. This makes us the ideal choice for providing CDM Co-ordinator services.

GNA are members of the Institute of Construction Safety.

Design

In conjunction with our design partners in Architecture and Structural Engineering we are well placed to provide a one stop shop for professional services and project delivery. Our in house team is well equipped to provide design services for smaller projects and extensions.
