Cadet Training Centre
Public / Government
Yardley Chase, Northampton
EMRCFA
£6.2m

The works consisted of demolishing the former dilapidated facility and the subsequent construction of the 3 new buildings to form a new and modern residential cadet training centre and associated buildings for the EMRCFA.

The project, spanning over 48 weeks, included the construction of a new residential building incorporating lecture rooms and offices, training hall, rifle range and guard room. Works also included construction of new roads, landscaping and a bin & garage store. The works were carefully phased to allow operation functionality of the site by the continued utilisation of some of the building prior to their demolition at the end of the construction phase.
