New Superstore
Retail
Osmaston Park Road, Derby
B&Q plc
£9m

GNA provided cost consultancy and QS services as part of a multi-disciplinary team. The new superstore was designed by CHQ-Partnership Architects with the principal contractor being Bowmer and Kirkland Ltd.

The award winning building measures 14,000sqm, making it the largest in the UK at the time of completion.

Construction includes security fences to the rear and side of the building and to the front is a tarmac car park that includes cycle racks, new trees and landscaped areas.

The external design is aesthetically pleasing for what is essentially a warehouse and store; the internal features include a staff lift for wheelchair users, staff changing and showering facilities.
