Construction of 3 nr Detached Classroom Pods
Education
Plympton, Plymouth
Boringdon Primary School
£1.2m

The works to the school consisted of the construction of 3 separate classroom 'pods' Each pod is designed to incorporate 2 classrooms, a shared resources area, storage, WC facilities and a cloakroom.

The pods use the latest in sustainable technologies and techniques.
Including a mixed mode ventilation system, high level installation and a north facing construction designed to minimise the consumption of energy used for heating and lighting.

The construction was phased over two stages to allow early occupancy whilst the demolition works were still ongoing.

GNA ensured costs were controlled and that Health and Safety was managed to help deliver another successful project.
