Working as part of a team alongside Citroen's Brand Identity Manager and Dealership Principle; GNA provided Project Management, Quantity Surveying and CDM Services.

Our specialism in Internal and External refurbishment of existing dealerships made us the perfect choice to help deliver this new corporate identity package.

The now completed scheme was this refurbishment and rebranding of a Citroen Dealership in Lincoln.

This Project represented phase 1 of the refurbishment of a Multi-brand car centre and presented its own unique challenges to maintain continued trading of the site as a whole.

A phased approach was adopted to ensure minimal disruption to other businesses on the site.

Phase 2, consisting of the incorporation of a Chrysler showroom has now also been completed along with a Harley Davidson outlet and showroom to the rear.
